## BITE THE BULLETIN

Using over 25 years in the supply and distribution of exhausts and catalysts, **CES** says it offers technical expertise that is second to none, as is its product knowledge and range.

The latest additions to its comprehensive range includes:

- Catalysts – Saab 9-3 1.8t, Vauxhall Frontera 2.2TDSL, Mazda Premacy and BMW 320d (Euro IV specification).
- Expanded range of type approved cats to over 900 part numbers.
- Exhaust systems – Nissan Figaro 1.0 turbo, Toyota Estima/Lucida, BMW Z3/Z4, LDV Maxus 2.4TD and Nissan 350Z.

Updates on this type of product can be found in the company's forthcoming technical bulletin on exhausts and cats. It also highlights the range of emission control components, such as diesel particulate filters (DPFs). CES believes this relatively

new technology is set for massive growth because of the pending Euro V and Euro VI emissions regulations. **Request readerlink 055**

## BOR IN ORDER

Launched with the claim to be the 'holy grail' for vehicle oil, **NANOBORON UK** is clearly confident that in the shape of BORPower it has a product from which you can derive numerous benefits. It is an oil additive which the company says has been scientifically proven to improve fuel consumption.

Other product benefits include: extended engine life span (up to 100%), reduced maintenance costs and prolonged service intervals. Efficiency-wise, it is said to improve engine power, lessen engine wear, reduce oil temperature and also last up to an impressive 40,000 miles of vehicle use. Finally, the product is environmentally friendly – being non-toxic, non-acidic and chemically inert – which results in less emissions, waste and engine noise.

## FLIGHT OF THE NAVIGATOR

**TEXA's** addition to the NAVIGATOR TX range is the NAVIGATOR TXC. This is a PC based multi-brand diagnostic interface. The TXC can communicate with cars equipped with an EOBD socket (vehicles manufactured after 2001).

In particular the NAVIGATOR TXC allows the following functions:

- Self-diagnosis to read and clear the error memory, display system parameters and status of the ECU.
- Activation, adjustment and configurations which are essential to carry and complete the repair.
- Resetting of service and maintenance systems.
- Configuration of ECUs, reprogramming of keys and remote control.

With the release of IDC3 CAR version 32 software, Texa has added an additional new feature 'TGS2' – Texa Global Scan 2. This offers the technician an automatic system search and identification across a wide range of vehicle makes and models.

## CHASSIS COME HOME

A further range extension has been announced for **TRW AUTOMOTIVE AFTERMARKET's** chassis

programme, comprising 70 new products, the range extension covers 1,237 applications. Behind this extension is the company's belief that forward thinking businesses – those who understand their market, their customers and who have the right, positive attitude, will weather the economic storm that we currently find ourselves in.

The range extension comprises: four brake drums, two new brake discs, 19 brake pads, seven brake shoes, one shoe fitting kit, one master cylinder, eleven hoses and 25 steering and suspension parts.

Applications for the new references cover a wide spectrum of marques and models, and include the popular: Toyota Auris, Toyota Yaris, Vauxhall Astra and Vauxhall Zafira.
