

AUSTRIAN NANOTECHNOLOGY FOR ALL ENGINES

## Customer Feedback

„As an independent car mechanic, I'm always very skeptical about oil additives ... However, I am totally convinced after a longer ride! I have always struggled with high oil temperature.„

„(160 km / h: 125-130 ° C). Now with the additive, the oil temperature dropped significantly (about 110-115 ° C at 160 km / h). „

„Have tried the Nano Green with my Audi S4 B5 and must say that the engine works noticeably better.„

„New vehicles will also be equipped with BORPower. Vehicle preparation Saubermax.„

„Engine runs much quieter! Despite its 306,000 km. Fuel consumption has dropped by 0.3l so far! So I'm excited! „

„BORPower on the test bench with a BMW M2 @ chipfactory\_gmbh! The result is impressive. 40% less vibrations and 5% more power. „

„Running smoother and oil temperature has dropped by 6 degrees - so far, I can only say positive things.„

„300 km consumption test on a VW 1.9PD with 131 hp! Used MS250 + diesel system cleaner. The results are noticable. Less fuel consumption, noticeably quieter engine running and ultimate engine protection! „

AUSTRIAN NANOTECHNOLOGY FOR ALL ENGINES

Ultimative **ENGINE PROTECTION**  
more **POWER** and  
**REDUCED CONSUMPTION!**

AUSTRIAN NANOTECHNOLOGY FOR ALL ENGINES

# BORPower NanoGreen – TINIEST Nanoparticles for a GIGANTIC Effect!

## WHAT IS BORPOWER NANOGREEN?

- ◆ BORPower NanoGreen is an oil additive, that was developed in order to protect engines by reducing any friction between the moving parts. The decrease in friction leads to an increase in power and a significant reduction of engine wear and corrosion.
- ◆ The uniqueness of BORPower NanoGreen stems from the fact that it reduces friction physically and not chemically.
- ◆ Unlike other additives BORPower NanoGreen is inert and does not contain any chemical friction modifiers that may adversely affect the delicate balance of any motor oil formulation.
- ◆ BORPower NanoGreen is a Hightech-Product based on Nano-Technology and is made by means of a proprietary detonation process in which Boron, the second hardest element known to man, is reduced to nanometer size. In the engine BORPower creates a nano size ball bearing effect.
- ◆ These Nanoparticles create a protective layer (one million times thinner than a millimeter), that also smoothens the inner walls of the engine and significantly reduces friction and improves heat transfer.
- ◆ BORPower NanoGreen is suitable for all vehicles with 4-stroke-engines.
- ◆ BORPower NanoGreen is compatible with all organic and synthetic oils.

AUSTRIAN NANOTECHNOLOGY FOR ALL ENGINES

money **SAVED**,  
 Emissions **REDUCED**,  
 engine **PROTECTED**  
 and ultimate driving Pleasure  
**ENSURED!**

Attention! NO EFFECT ON MANUFACTURER'S WARRANTY: According to EU legislation - the use of oil additives does not affect your vehicle's manufacturer warranty!

**BORPOWER NANO-GREEN BENEFITS!**

UP TO **20%**  
LESS CO2

UP TO **5%**  
MORE POWER

UNPROBLEMATIC  
**COLD START**  
IMMEDIATE PROTECTION -  
EVEN AT SUB ZERO TEMPS.

**3-10%** HIGHER  
MILEAGE

**LONG LASTING**  
PROTECTS FOR AN ENTIRE OIL CHANGE INTERVAL

EFFECTIVE NANOTECH  
**ENGINE PROTECTION**

**10% LOWER**  
OIL TEMPERATURE

SIGNIFICANTLY  
**LOWER EMISSIONS**

SMOOTHER  
**RUNNING ENGINES**  
UP TO 50% LOWER VIBRATION VALUES

AUSTRIAN NANOTECHNOLOGY FOR ALL ENGINES

# BORPower NanoGreen for all Engine Sizes!

## BORPOWER NANOGREEN MS-250 250 ml

- ◆ For all 4-Stroke-Engines with 0-6l Oil Capacity
- ◆ For Gasoline, Diesel, LPG and Gas Engines

**BORPOWER NANOGREEN IS ESPECIALLY SUITABLE FOR TUNED AND HIGH PERFORMANCE ENGINES!**

## BORPOWER NANOGREEN MS-600 400 ml

- ◆ For all 4-Stroke-Engines with 6-18l Oil Capacity
- ◆ For Gasoline, Diesel, LPG und Gas Engines

## BORPOWER NANOGREEN MS-900 900 ml

- ◆ For all 4-Stroke-Engines with 6-18l Oil Capacity
- ◆ For Gasoline, Diesel, LPG und Gas Engines

## BORPOWER NANOFUEL FORONE BENZIN (GASOLINE) FUEL ADDITIVE 200ML

- ◆ Improved combustion and engine performance
- ◆ 10% lower exhaust temperatures (turbo charger protection ) Cleans the intake system
- ◆ Cleans and lubricates the fuel injectors
- ◆ Reduced exhaust emissions (CO2-NOx)
- ◆ Boosts Octane value of the Fuel
- ◆ Binds condensate and inhibits corrosion in the fuel system

## BORPOWER NANOFUEL FORONE DIESEL FUEL ADDITIVE 200ml

- ◆ Improved combustion and engine performance
- ◆ Improves vehicle acceleration
- ◆ Reduces emissions
- ◆ Cleans the intake system
- ◆ Cleans and lubricates the fuel injectors
- ◆ Cold weather protection for Diesel Fuel
- ◆ Lubricates injector- and high pressure Diesel pumps
- ◆ Binds condensate and inhibits corrosion in the fuel system
- ◆ Inhibits bacterial contamination of the fuel system

## BORPOWER NANOFUEL FORONE DIESEL PARTICLE FILTER-CLEANER (DPF)

- ◆ Keeps particle filter clean during vehicle operation
- ◆ Maintains engine power and performance
- ◆ Lowers Fuel consumption
- ◆ Mitigates the risk of expensive particle filter servicing
- ◆ Dissolves and removes typical particle filter residue
- ◆ Ideal for city vehicles

## BORPOWER GBX-GEAR 250 ml

- ◆ For all manual and differential gear boxes
- ◆ Promotes smoother gear shifts
- ◆ Highly active wear protection
- ◆ Protects against overheating
- ◆ Protects against oxidation and corrosion
- ◆ Not suitable for automatic transmissions

Up to 10% more power

Noticeably smoother

Most effective engine protection even with lack of oil

Better cold running characteristic

Longer life of the diesel particulate filter

lower oil consumption

improved emission values

longer oil lifespan

longer service intervals

reduced fuel consumption

eco friendly
